

ONLY LED DISPLAY

PROFESSIONAL LED DISPLAY MANUFACTURER

ABOUT US

ONLY LED was founded in 2006, with headquarters located in Bao'an Shenzhen - The center of Science and Technology of China. ONLY LED is mainly engaged in the research and development, production, and export sales of outdoor and indoor LED display and peripheral products. Production facility covers an area of more than 8,000 square meters equipped with multiple automated production lines and advanced manufacturing equipment. It adopts a modern enterprise management model, and a programmatic & standardized quality monitoring system. The products produced by ONLY LED are extremely outstanding and the craftsmanship is exquisite. At ONLY LED, we are Brighter Smarter Greener. ONLY LED is looking for distributor of our products.

Strong market service network covering the world

While our roots are in Shenzhen, our reach extends far beyond. Since our inception, we have exported LED displays to more than 100 countries and regions worldwide. We have always prioritized independent research and development, constantly pushing the boundaries of what is possible in LED display technology.

Professional engineering design solutions

Efficient response, professional service

U-PRO-S Series Display

Features

- Die-casting aluminum panel 1' x 2'
- High brightness and high refresh rate LED display
- Common cathode LEDs, truly energy saving design
- Modular mounting frames 1' x 2'
- Front serviceable LED panel
- Slim and light weight
- ETL and FCC product
- IP66 rating

U-PRO-S Series Display Features

Passive heat dissipation with patented technology, featuring ICs directly attached to the aluminum housing for rapid and uniform heat distribution, seamlessly integrating heat conduction and dissipation.

The Common Cathode Solution offers 40% energy savings and reduces temperature by 20°C, ensuring higher efficiency, lower power consumption, and superior heat dissipation for brighter, cooler, and more durable LED displays.

More elegant, stronger, heat-resistant, and highly durable, with exceptional thermal conductivity for an extended lifespan.

Lighter and thinner with high splicing precision for seamless alignment and easy installation.

XT-PRO Series Display

I Features

- Aluminum led cabinet 1,000MM x 1,000MM
- High brightness and high refresh rate LED display
- Common cathode LEDs, truly energy saving design
- Front serviceable LED cabinet
- Slim and light weight
- Can customize 500*1000mm and 750*1000mm LED cabinets

XT-PRO Series Display Features

Easier installation and maintenance

Each LED cabinet consists of 4, 6, or 8 LED modules, with each module operating independently, ensuring that even if one module malfunctions, the rest of the display continues to function normally.

With comprehensive waterproof and dustproof protection, the cabinet achieves an IP66 rating, ensuring reliable performance even in harsh environments—no matter the conditions, our LED displays operate flawlessly.

Better heat dissipation

Adopting an energy-saving common cathode LED design with a dual-voltage power supply, our solution offers lower power consumption, reduced heat generation, and an extended lifespan compared to traditional LED displays.

The energy-saving design primarily comes from the power supply, with each LED cabinet utilizing a 2.8V to 4.2V DC power system, making it more efficient than conventional power supplies and achieving an average of 30% energy savings compared to traditional LED displays.

XT-E Series

The XT-E series full-color outdoor display is a new generation of LED display, featuring a high-strength, slim aluminum cabinet with excellent sealing. This design ensures strong screen body connection and reliable load-bearing for the entire display. With an IP66 rating, the cabinet is fully waterproof, and the electronics are completely sealed inside, ensuring that our products can perform in even the harshest environments.

Product characteristics:

High refresh rate

High Brightness

Long Life-span

Waterproof Rate Ip66

High Stability

International Approvals

Auto calibration

Running time

Signal monitoring

Smart Module

The smart module can store its own calibration data. When the module is replaced, the calibration data is automatically updated to ensure uniformity across the display. Additionally, the system can monitor the working status of key components and upload the results to the server for continuous performance tracking.

Common cathode LEDs and Energy saving

Common cathode LED technology is an energy-efficient solution, offering high light efficiency, long lifespan, and low temperature operation. It features reduced heat generation and lower energy consumption, making it a more sustainable and cost-effective choice for LED displays.

Colorful Pictures

The display utilizes RGB imaging technology to showcase a wide range of colors, including red, orange, yellow, white, green, blue, and up to 4.4 trillion colors. Its visual effect closely matches the human retina, meeting nearly all display area requirements. The color temperature is adjustable from 2500K to 10000K, making it suitable for various settings and adaptable to both human preferences and external equipment needs.

Working In Harsh Environment

Our LED display is waterproof, damp-proof, dustproof, and equipped with lightning protection, anti-electromagnetic interference, and anti-UV features. It is designed to withstand extreme high and low temperatures, as well as other severe environments, ensuring consistent performance in all conditions.

MINI FLIP-COB Series Display

Features

- Ultra-Thin & Lightweight Design LED panel 600*337.5mm
- High-Quality Visuals with Wide Viewing Angle
- Silent & Energy-Efficient Performance
- Ultra-High Refresh Rate (3840Hz)
- Dual-Signal Backup for Stability
- Fully Front Maintenance

MINIFLIP-COB Series Display Features

Light-weight and thin

H series Indoor LED cabinets have a thickness of only 39.5mm. The slim and high-strength design supports dual-sided installation. With wall mounting, there is no need to reserve a maintenance channel behind the screen, providing more usable space in limited indoor environments. Compared to similar products in the market, the H series cabinets are 40% lighter, making them easy to install and savings on transportation and installation costs. Additionally, they reduce the load on the building structure, ensuring stability and reliability!

Low Brightness, High Gray, Loss-less Technology:

Every detail in the dark area is meticulously presented. In comparison to traditional LCD and DLP sliding screens with limited viewing angles and distortion, LED fine pitch displays offer a generous 160° viewing angle, high-fidelity images, color accuracy, and a broader audience appeal.

Perfect Display from Different Angles with a 160°

Effective Viewing Angle:
In contrast to the limited viewing angles and image distortion of traditional LCD and DLP sliding screens, our LED fine-pitch displays offer a generous 160° viewing angle, providing high-fidelity images without color deviation, making them suitable for a broader audience.

Experience the Transient Brilliance with an Ultra-High Refresh Rate:

With an impressive refresh rate of up to 3840Hz per second, supporting rapid decoding responses, our display eliminates screen ripples and image ghosting, ensuring every frame is clear, smooth, and delivering the optimal visual experience.

3840Hz

Backup: "Two-way" Backup:

The display screen is equipped with a two-way signal backup system, which ensures that during live broadcasts or in the event of signal transmission failures, the backup signal will be automatically activated to guarantee the stable operation of the display system.

Fully Front Maintenance Design:

Fully front maintenance is a crucial requirement for fine pitch installations. It effectively ensures installation thickness, with a minimum thickness of 39.5mm for wall mounting. There is no need for installation of maintenance channels, providing better protection against dust accumulation that could harm electronic components and PCB boards. Quick module replacement with electric suction tools enhances maintenance efficiency, ensuring fire safety and electrical security.

Silent and More Energy-Efficient:

The aluminum backshell provides efficient heat dissipation, eliminating the need for fans and, consequently, the resonance noise typically caused by fans and air conditioning. Operating in complete silence is not only environmentally friendly but also helps to reducing the power consumption of the display, thereby effectively lowering operational costs.

PRIME SERIE FINE PITCH INDOOR LED PANEL

- Available in multiple dimensions, including 337.5 × 1200mm, 320 × 1280mm, and more.
- Extruded aluminium LED panel for enhanced elegance and durability.
- Fine pixel pitch delivers an immersive indoor visual feast.
- Options available in both SMD and COB models.
- Engineered for easy and convenient installation.
- Factory direct sale, supporting OEM and ODM.

LED CABINET PARAMETERS

LIGHT AND SLIM

The PRIME Series cabinet is only 48mm thick, with a high-strength structure supporting double-sided installation. Wall-mounted installation requires no maintenance access behind the screen, leaving more usable space. Compared to similar products on the market, the cabinet is 40% lighter, making it easier to install, saving transportation and installation costs, while also reducing the load on the building structure for enhanced stability and reliability.

LOW BRIGHTNESS, HIGH GRAY, LOSSLESS TECHNOLOGY

Every detail in the content is vividly presented due to the advanced processing technology that utilizes 16-bit processing, ensuring excellent grayscale performance.

"TWO-WAY" BACKUP

The display screen features a two-way signal backup design, ensuring that in case of signal transmission failure during live broadcasts or other events, the system will automatically switch to the backup signal, and ensures stable operation of the display system.

EXPERIENCE THE TRANSIENT BRILLIANCE WITH THE ULTRA HIGH REFRESH RATE

With an impressive refresh rate of up to 3840Hz per second, it supports rapid decoding response, eliminating screen ripples and image ghosting from captured footage. This ensures that every frame is clear and smooth, delivering the optimal visual experience.

FULLY FRONT MAINTENANCE DESIGN

Fully front-accessible maintenance design is essential for small-pitch display projects. It effectively maintains the installation thickness, with a minimum thickness of just 48mm for wall-mounted setups, eliminating the need for a rear maintenance channel. This helps protect the product from dust accumulation that could damage electronic components and PCB boards. Quick module replacement using electric vacuum tools improves maintenance efficiency, while ensuring fire and electrical safety.

"BOARD-TO-BOARD" HARD CONNECTION

Eliminating the hassle of cables, the Led modules directly connects to the adapter board.

SILENT AND MORE ENERGY-EFFICIENT

The aluminum backshell provides efficient heat dissipation without the need for fans, preventing the resonance noise caused by fans and air conditioners. Zero-noise operation

160° ULTRA WIDE VIEWING ANGLE

The LED screen features with a wide viewing angle of 160°, providing clear and high-fidelity images without color deviation.

Product Parameters

Category	Parameter	Specification
LED DISPLAY	LED Display size	480mm x 960mm
	Pixel Pitch	2.5mm
	Display resolution (Pixels)	192 x 384
	Average Power Consumption	200W (Depends on display content)
	Lifespan	≥100,000 hours
	Brightness (cd/m ²)	≥4500 cd
	Protection Level	IP65
	Refresh Rate	≥3840Hz
Mainboard	Model	OL88
	CPU	Cortex A55 Quad-Core 1.5GHz
	GPU	Mali-G31MP2 (Supports OpenGL ES2.3, OpenCL 2.0, Vulkan 1.0)
	System Memory	8GB eMMC + 1GB LPDDR3
	Wi-Fi	IEEE 802.11 b/g/n 2.4G
	GPS	GNSS GPS/Beidou/Glonass
	Operating System	Android 9
	Communication Modes	Ethernet, Wi-Fi, USB, Optional 4G Module
	Software	LedOK Express Xixun /Huidu optional
	Other Port Support	USB 2.0, RS485, RS232, TTL Interface, Video Input Options
Cabinet	Outer Color	Black, White, and Custom Colors Available
	Cabinet Size (HxWxD in mm)	1208.1 x 526.0 x 69.7mm
	Package Size (HxWxD in mm)	1300 x 623 x 170mm
	Net Weight	30kg
	Gross Weight	33kg
Battery	Capacity	50,000mAh
	Total Power	1260Wh
	Input Voltage	110-220V AC
	Runtime	≥8-10 hours
	Battery Level Indicator	YES (Locate at rear of product)
Environment	Operating Temperature	-20°C to 55°C
	Storage Temperature	-40°C to 85°C
	Operating Humidity	10% to 98%
Maintenance & Warranty	Warranty period	1 Year
	Technical Support	10 Years

Holographic Invisible Display

Features

- PV Series Holographic LED Mesh by ONLY LED
- Turn Glass Windows into Digital Displays
- Perfect for retail, offices, exhibitions, hospitality, and more.
- Sizes: 1000x250mm, 1200x250mm, or customizable
- Features:Transparent visuals without blocking views

Compact, lightweight, and easy to install

- Pixel Pitch: 3.91mm / 6.25mm | Brightness: 3,000cd/m²

Innovate your space with ONLY LED!

Holographic Invisible Display

All-in-One Direct View LED Displays

Features

Setting a New Standard for Conference Screens

ONLY LED' s all-in-one LED screen delivers a bezel-free, high-definition (1920x1080) display with an elegant aluminum die-cast frame. Combining HDTV, a digital whiteboard, and video conferencing in one, it ensures seamless presentations and collaboration. Key features include a high refresh rate, 160° viewing angle, front serviceability, built-in controller with DVI/HDMI support, dual backup, and a 3-5 year warranty.

Application Scenarios: Conference rooms, studios, universities, and digital media spaces.

Product main specifications

Model Number	OTV163IN	OTV136IN	OTV108IN
Pixel Pitch	1.87 mm	1.56 mm	1.25 mm
Pixel Configuration	3 in 1 SMD 1515	3 in 1 SMD 1010 or Mini LED 4in1	3 in 1 SMD 1010 or Mini LED
LED screen area (W × H)	3,600 x 2,022 mm	3,000 x 1,685 mm	2,400 x 1,348 mm
Screen Resolution (W × H)	1,920 × 1,080 Pixels	1,920 × 1,080 Pixels	1,920 × 1,080 Pixels
Frame color	Black (customize other colors)	Black (customize other colors)	Black (customize other colors)
Product overall dimensions (W × H × D)	3605mm* 2148mm*32mm	3,005 mm* 1,811mm*32mm	2405mm* 1474mm*32mm
Screen Weight	≈165KG	≈118KG	≈80KG
No. of Cabinet per Screen (W × H)	6 × 6	5 × 5	4 × 4
No. of Modules per Cabinet (W × H)	2 × 2	2 × 2	2 × 2
Cabinet Resolution (W × H)	320 x 180 pixels	384 × 216 pixels	480 × 270 pixels
Cabinet Dimensions (W × H × D)	600 × 337 × 32 mm	600 × 337 × 32 mm	600 × 337 × 32 mm
Flatness of Cabinet	± 0.2 mm	± 0.2 mm	± 0.2 mm
Cabinet Material	Die Casting Aluminum		
Service Access	Front		
Brightness (Max.)	800 to 1,000 cd/㎡		
Color Temperature	6,500		
Visual Viewing Angle (Horizontal)	160		
Visual Viewing Angle (Vertical)	140		
Brightness Uniformity	95%		
Color Uniformity	± 0.015 Cx, Cy		
Contrast Ratio	5,000 : 1		
Processing Depth	16 bit		
HDR Compatibility	HDR10, HDR10 Pro2)		
Power Consumption (W / Screen, Max.)	4,300 W	3,000W	2,000W
Power Consumption (W / Screen, Avg.)	1,300 W	900W	700W
Power Supply (V)	AC 100 - 240 V		
Frame Rate	50 / 60 Hz		
Refresh Rate	3,840 Hz		
Sound Output	Optional		
LED Lifetime (Half Brightness)	100,000		
Operating Temperature (° C)	0 ° C to 40 ° C		
Operating Humidity	10 % to 80 %		
Video Inputs	HDMI		
Special Features for option	Temperature Sensor, Ambient Light Sensor		
Basic Accessory	Data Cable, LAN Cable, Power Cord, Manual		
Optional Accessory	Screen wall-mount brackets, Floor Stand

Newly Designed Custom-shaped LED Display

Flexible LED Modules, High Flexibility, Customizable in Various Sizes

- ✓ Customizable Sizes, Seamless Integration
- ✓ Wide Viewing Distance and Angles
- ✓ Vivid and Clear Colors with Strong Sense of Dimension
- ✓ Easy to Operate, Supports Remote Control
- ✓ Super Bright, Clear Image
- ✓ Good Color Reproduction
- ✓ Easy to Operate, Supports Remote Control
- ✓ Diverse Display Options

Basic Information

Product Name: Custom-shaped LED Display

Product Model: P1.25/P1.53/P1.86/P2/P2.5/P3/P4/P5/P6/P8/P10

Unit Board Weight: 0.2-0.4kg Cabinet Weight: 35-55kg/m²

Service Life: 100,000 hours

Main Specifications

Brightness: 600-7000cd/m²

Refresh Rate: ≥7680Hz

Viewing Angle: H: >160°, V: >160°

Protection Rating: Indoor IP45 / Outdoor IP65

Custom-shaped LED Display Modules

LS Rental LED Screen Series

I Features

- Exquisite Appearance: Elegant die-casting magnesium alloy cabinets.
- Lightweight: Only 25 kg per sqm for easy transport.
- High Strength: Ensures stable and clear images.
- Easy Maintenance: Dual maintenance modes and modular design.
- Flexible Installation: Supports hanging, ground, wall, and curved setups.
- Waterproof Connections: Quick and secure for outdoor use.
- High Refresh Rate: Up to 3840Hz for smooth visuals.
- Long Lifespan: 100,000 hours with low malfunction rate.

LS RentalLED Screen Series
Features

With excellent strength and durability, the "LUXE-SPECTRA" series can withstand external challenges, ensuring stable and clear images throughout events.

An LED cabinet consists of 4 or 8 LED modules, each operating independently. If one module fails, the rest of the display continues functioning properly. Each module supports both front and back maintenance for easy servicing.

Model Number	LS-PH2.60-OSS	LS-PH2.97-OSS	LS-PH3.91-OSS	LS-PH4.81-OSS
